

HTML5 Party 1

Fundamentals

Week 1 – Full-Stack DPP Course

Welcome

Manuel Cubuca

Technical Trainer

Email: manuelc@justit.co.uk

Part 1 Outline

- HTML5 Overview
- The CASE STUDY
- Site Map, Wireframes and Style Tile
- Open an Hosting Account with one.com
- Create a FREE GitHub Account
- Semantic Markup and Progressive Enhancement
- HTML5 Strategy
- Build Website Skeleton (hands-on practice)

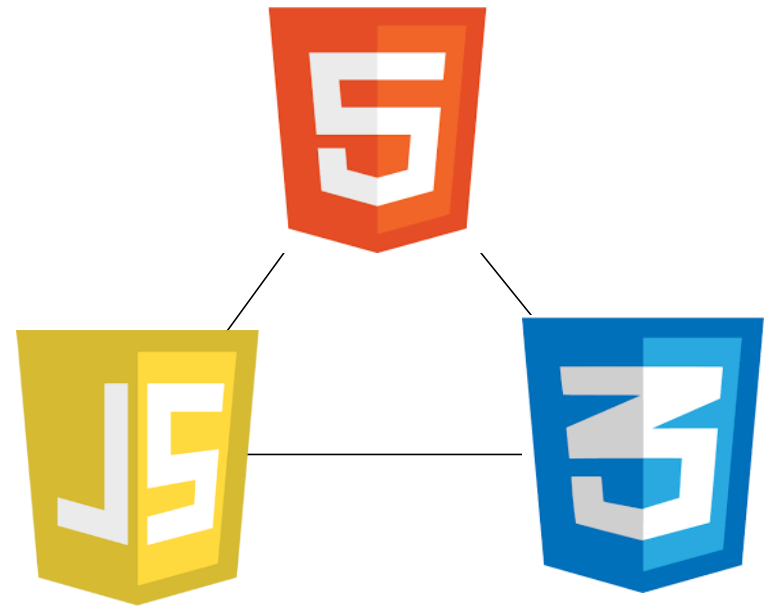

Part 1 Learning Objectives

- Learners would have a good understanding of:
 - What is HTML5
 - HTML5 new features and semantic elements
 - What are site maps, wireframes and style tile
 - Create webpage structure from scratch
 - Deploy HTML5 semantic tags
 - HTML5 attributes and their use
 - How to build the skeleton of a website

The Web Development Trifecta

- **HTML5** – structures and describes Web page content
- **CSS3** – provides the formatting and "look" of a Web page
- **JavaScript** – adds interactive, dynamic capabilities to Web pages

What is HTML5?

- Is a **collection** of **standards** including CSS3 and JavaScript are part of the new **definition**:
 - HTML5 is the newest version of HTML and replaces HTML4
 - Eliminates the need and use of plugins such as **flash** and **Silverlight**
 - HTML5 is cross platform application
 - Visit the W3C website for:

What we are updating

- [The Vintage Apparel Company:](#)

Hand coding from scratch

- Modern, user friendly, interactive and responsive:

Website Site Map (single page)

Home Section or Landing Page

Products Section

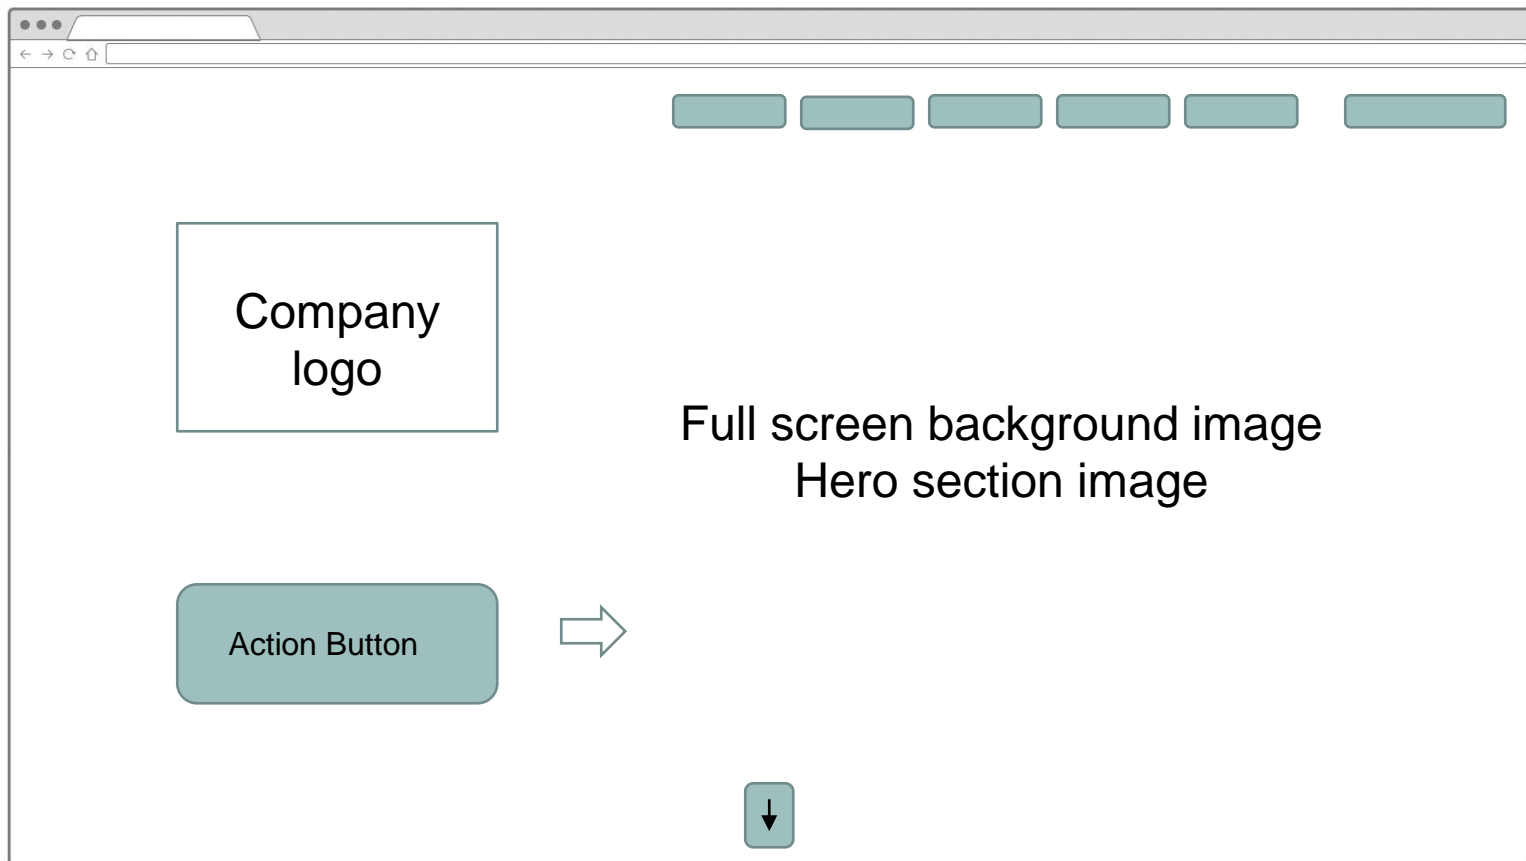

Sales Section

About Section

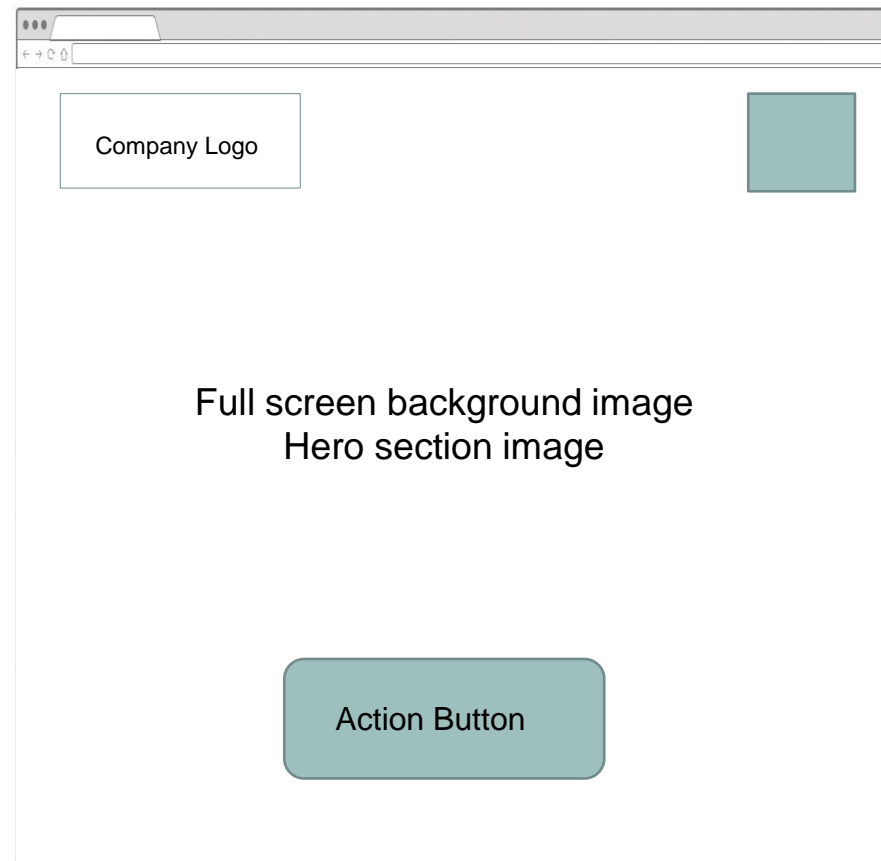

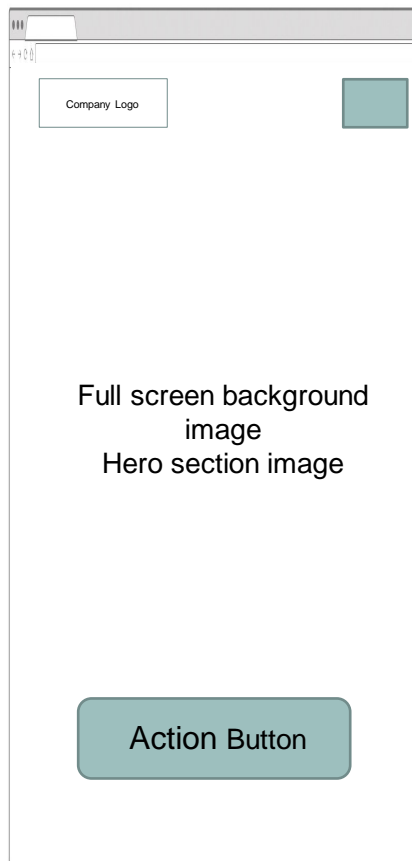

Contact Section

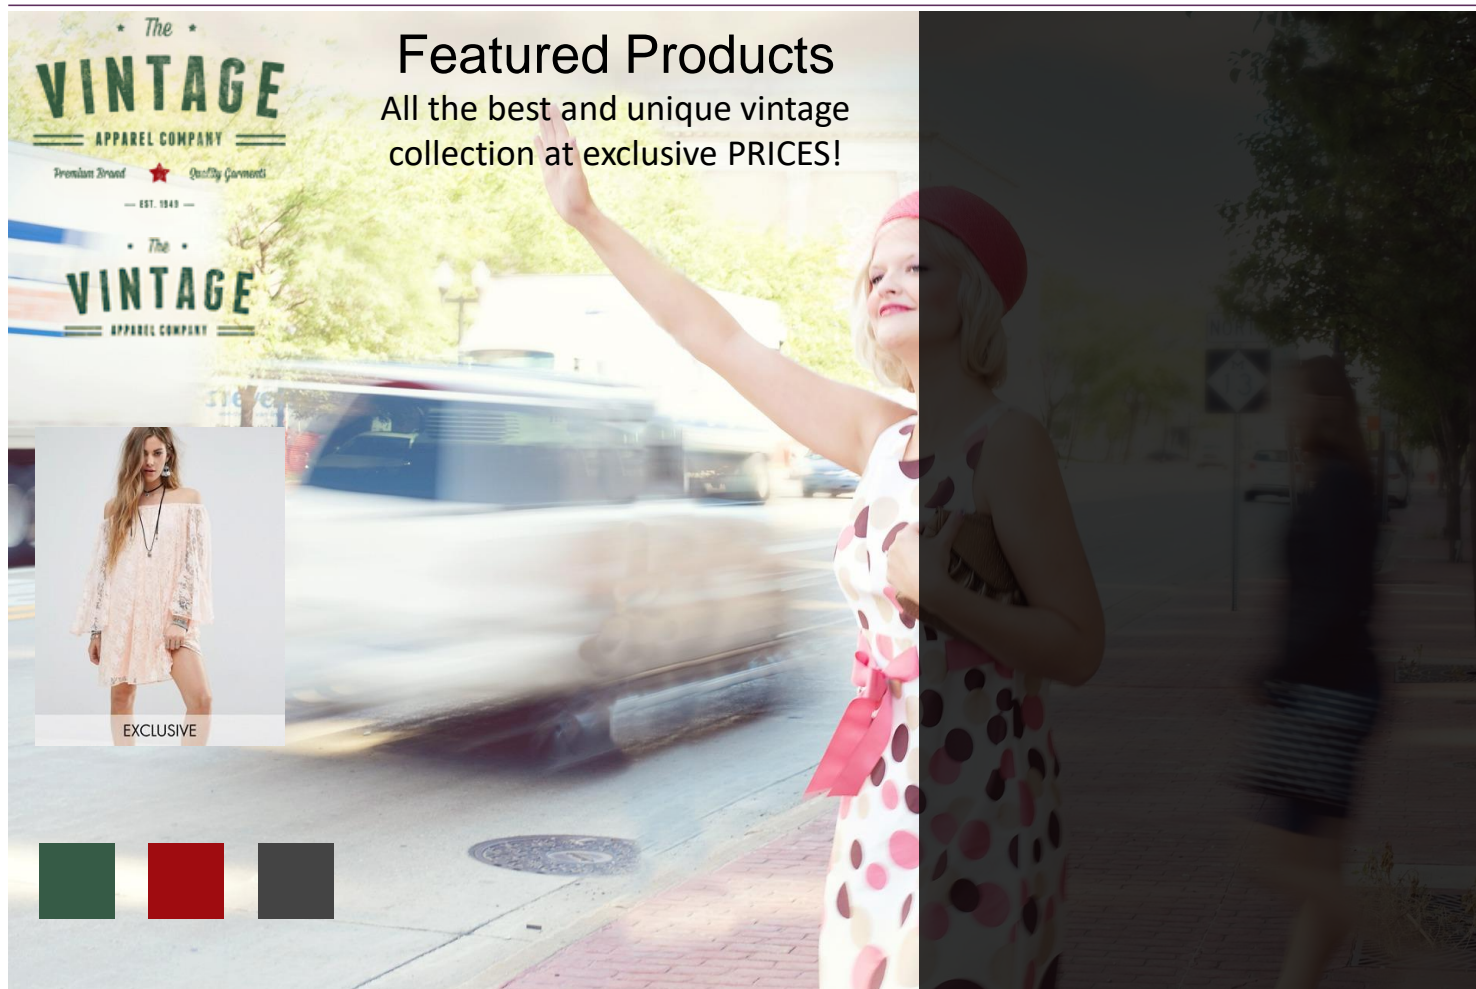

Website Wireframes

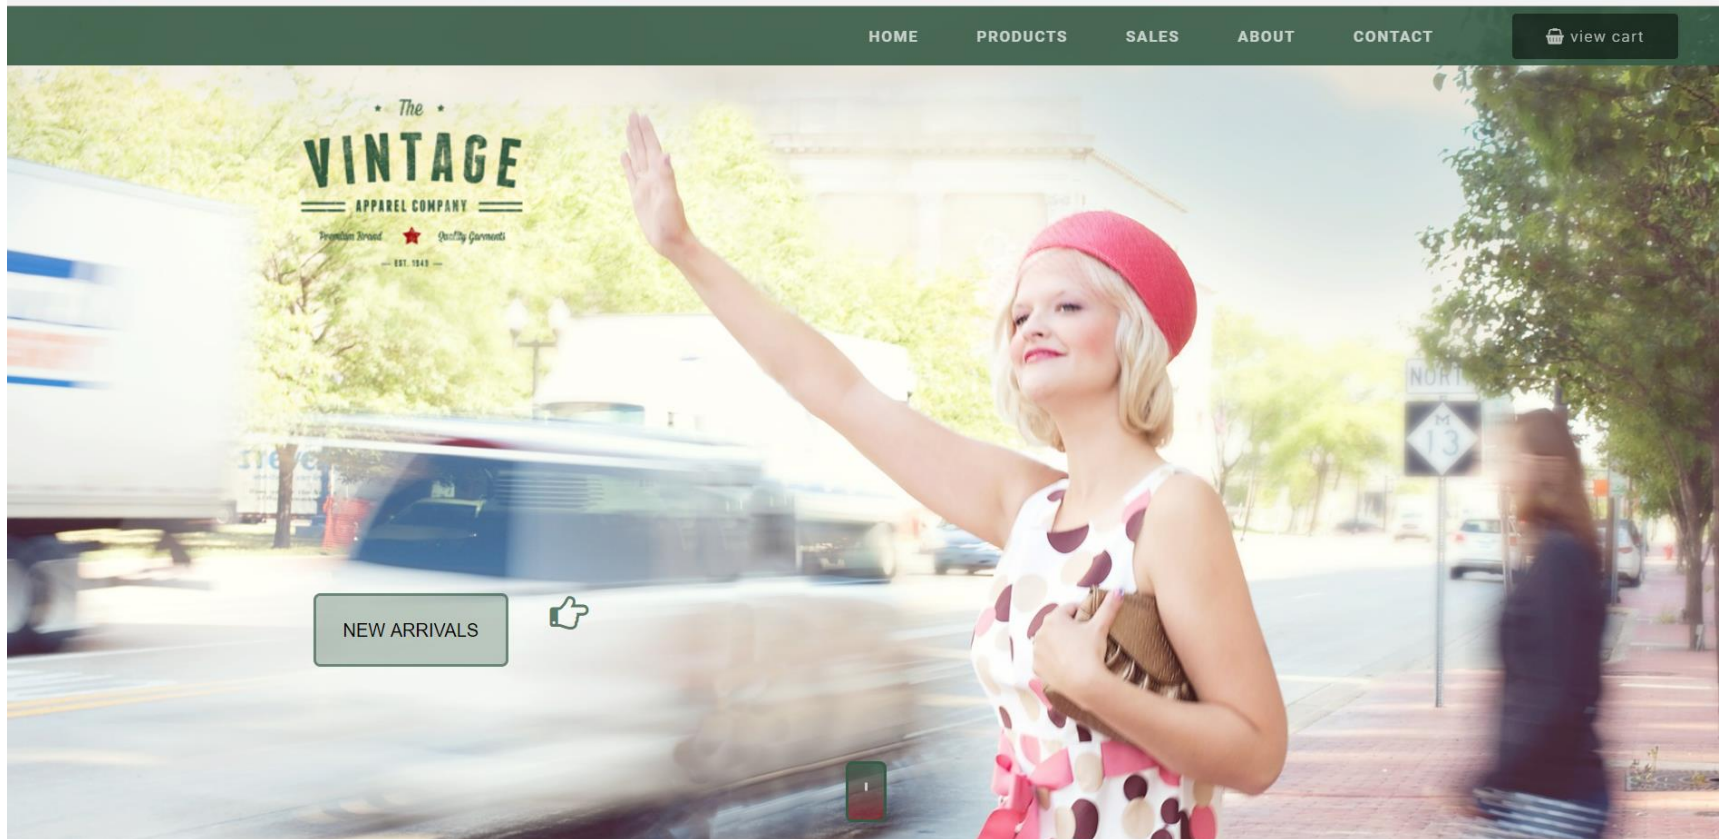

Website Wireframes

Website Style Tile

The Case Study

Download Files

Login into your VLE, look for HTML5 and CSS3 folder.
Inside the folder click on HTML5 Part 1.

or

Access my GitHub account and download the
HTML5 Part1 folder.

Text Editor

The image shows a screenshot of the Brackets.io website and the Brackets text editor interface. The website header includes navigation links: Brackets, Contribute, API Docs, Blog, and Support. The main content area features the text "A modern, open source text editor that understands web design." and a prominent blue button labeled "Download Brackets 1.9". Below this button is a link for "Other Downloads". The bottom portion of the image displays the Brackets text editor interface, showing a file explorer on the left with "index.html" selected, and the main editor window displaying HTML code for "index.html". The code includes a hero wrapper, a hero row, and a hero CTA button. The CSS file "brackets.io.css" is also visible in the editor's interface.

Semantic Markup and Progressive Enhancement

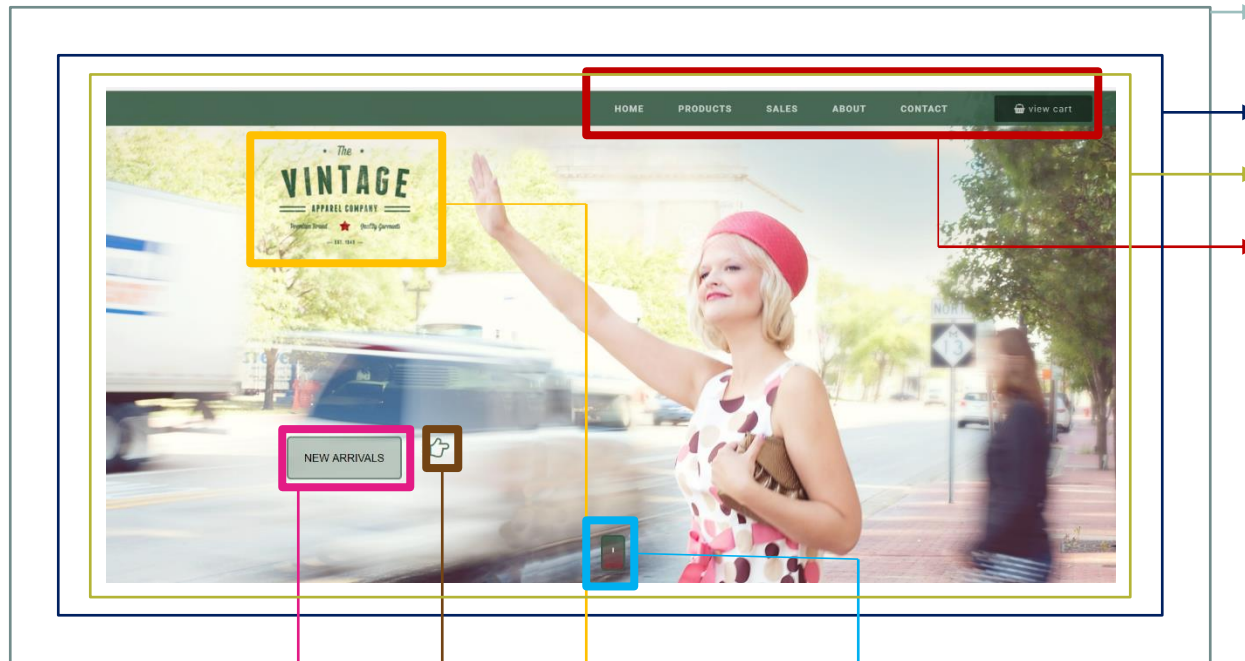

Semantic HTML is the use of HTML **markup** to reinforce the **semantics**, or meaning, of the information in web pages and web applications rather than merely to define its presentation or look.

The practice of adding technology in layers to a website to ensure that if all fails, **content** can still be **accessed**.

Separation of concerns
